Problem Statement For Frontend Developer Intern

Privacy - Terms

Problem Statement for Assessment Round – PLEASE TAKE SCREENSHOT OR PRINT THE PAGE AND DO NOT REFRESH

"Problem Statement: Real Estate Listings You are required to develop a real estate listings web application using React. The real estate listings should allow users to view and search for properties for sale or rent. The following features are required:

1. *User Authentication: Users should be able to sign up, log in, and log out.*

2. *Property Listings: A list of properties with their details (address, price, type, images, etc.).*

3. *Property Search: Users should be able to search for properties based on different criteria (location, price, type, etc.).*

4. *Property Details: Users should be able to view the details of a property, including its description, images, and location.*

5. *Contact Agent: Users should be able to contact the agent responsible for the property by sending an email.*

6. *User Dashboard: Users should be able to view a list of their saved properties and view their contact history.*

Technical Requirements:

1. *React 16.13 or higher*

2. *Use of Redux for state management*

3. *Use of Axios for API calls [Use any publically available APIs or Firebase]*

4. *Proper use of React components, hooks, and routing*

5. *Proper use of async/await for handling asynchronous actions*

6. *Proper use of React Bootstrap or any other UI library*

7. Proper use of form validation and error handling

Deliverables:

1. The source code of the project is properly documented.

2. A brief report explaining the solution's architecture and the design decisions are taken.

3. Deployment instructions for the application.
